

# Time Capsule Data

Encrypt today. Deliver tomorrow.

MARKETING BROCHURE · 2026

# Protect what matters. Deliver when the time is right.

A secure digital vault for documents, images, and videos. Seal them with dual-key encryption, name a trusted nominee, and schedule automatic delivery — only when the date arrives.

AES-256-GCM encryption

Scheduled delivery

UPI QR payments

One-time download links

## HOW IT WORKS

# From upload to delivery — five clear steps.

Every capsule follows the same careful path: encrypt immediately, confirm payment, wait for your date, then notify your nominee with a secure link.

### STEP 01

#### Create an account

Register with email and phone. Sign in from any browser — no software to install.

### STEP 02

#### Choose a plan & upload

Pick Document, Image, or Video vault. Set an encryption password known only to you.

### STEP 03

#### Name nominee & date

Add the recipient's details and choose the exact day the capsule should open.

### STEP 04

#### Pay via UPI QR

Scan, pay, submit UTR. An administrator verifies payment before activation.

### STEP 05

#### Automatic secure delivery

On the scheduled day your nominee receives an email with a one-time download link — time-limited and single-use.

## DUAL-KEY ENCRYPTION

# Two keys. Stronger by design.

### Your password key

Derived with Argon2id from the password you enter at upload. Decrypt your own files later with that password — the server never stores a recoverable copy of it.

### Server master key

A second wrapped key enables scheduled nominee delivery without needing your password on delivery day. Ciphertext is stored under unique IDs with SHA-256 integrity checks.

PLANS

# Simple pricing. One capsule at a time.

Pay per upload after you seal the file. UPI QR payment with human verification before the capsule activates.

DOCUMENTS

## Document Vault

₹3,000

per file · up to 3 MB

- PDF, TXT, DOC, DOCX, XLS, XLSX
- Dual-key AES-256-GCM
- Nominee + scheduled delivery
- Owner download with password

IMAGES

## Image Vault

₹5,000

per file · up to 5 MB

- Photos & scanned pages
- Encrypted at upload
- One-time nominee link
- Admin payment verification

VIDEO

## Video Vault

₹5,000

per 100 MB (ceiling)

- Unlimited size, block pricing
- Same dual-key protection
- Scheduled email delivery
- Audit trail of vault actions

WHO IT'S FOR

### Families & individuals

Private letters, account notes, or recorded messages for a spouse, child, or relative — delivered on your chosen date.

### Professionals

Schedule handover of sensitive papers or contingency instructions to a nominated colleague when the time is right.

### Creators & founders

Protect source material and legacy media, then release a one-time download to your nominee automatically.

### You stay in control

Before delivery you can review, download (encrypted or decrypted), or remove a file if plans change.

BUILT FOR TRUST

# Security is not a slogan — it is the product.

Modern cryptography, verified payments, and deliberate delivery limits so sensitive files are not left open forever.

## AES-256-GCM · Argon2id · One-time links

Files are encrypted the moment you upload them. Nominee download tokens are single-use and expire within hours. Payment must be verified before a capsule is activated for delivery.

### Payment gate

UPI QR + UTR submission with administrator review. Capsules activate only after Paid status.

### Nominee delivery

Email notification on the scheduled date with a secure, time-limited download link.

### Audit trail

Important vault actions are logged. Admins can review audits, email history, and scheduler runs.

### Account safety

Password reset over authenticated email, session protection, and account controls when needed.

## Seal what matters. Set the date.

Create your vault in minutes. Encryption happens before the file ever rests in storage.
